Much appreciated Matt. They listed the well as active in the most recent info I have. I am looking forward to getting a handle on this facility. Thanks!

Michele,

The well is located at

Latitude

35.376914

Longitude

-119.070966

It is located 675 feet within the shaded boundary. Our records indicate that the injection zone is the Etchegoin/Chanac and notes that the well was shut-in on 3/4/2002.

Subject: FW: Alon Refinery Injection Wells within the exempt aquifer

Hi Matt,

I was thinking about this today and I recalled in the back of my mind there was another well at Alon. I looked it up, and my memory, although a week later, was correct. There is a well called Red Ribbon 7, API 029-08304. Do you have the location of this well?

Thanks, Michele

Michele,

I have updated the maps showing refinery injection wells into the Santa Margarita Formation. All wells, for both the Alon and the San Joaquin Refineries, are within the exempted Santa Margarita Formation. In addition to your suggested comments, I have added an index map and more clearly labeled the Santa Margarita Injection wells.

Subject: Alon Refinery Injection Wells within the exempt aquifer

Michele,

As per our phone conversation last week, I have attached two maps which show that the Alon Injection wells are within the exempt Santa Margarita Aquifer by more than 525 feet.

Feel free to contact me if you need any further clarification.
